4th February 1998

Mr J D Logan  
President  
Metriguard  
P O Box 399  
Pullman  
WA 99163  
United States of America

Dear Mr Logan

Your facsimile of 19th January, regarding Model 7200 HC grading machine, was awaiting my return from leave.

My understanding was that Tony Fewell had acted as the UK Timber Grading Committee's technical expert for the approval of your Model 7200 HC. Therefore, his confirmation to you that the machine was approved was appropriate and reliable. However, I am please to confirm that information to you as we discussed yesterday :

"The UK Timber Grading Committee considered the Metriguard 7200 HCLT timber grading machine at its meeting on 13th November 1996. The machine was approved to grade structural timber for the UK market using the "output control" system".

The Metriguard CLT-1 remains approved for "output control" systems.

Should you have any queries on this or other structural timber grading matter, please contact me direct.

Yours sincerely

**Joe Hickmott**  
Secretary  
UK TIMBER GRADING COMMITTEE
